

# Help fight climate change this year by planting trees in Darfur, Sudan

Kids for Kids is committed to fighting Global Warming. As part of our policy of providing projects that help families long term, we are planting trees to help stabilise the deserts of Darfur, creating a microclimate and reducing the rate at which the Sahara is creeping south.

We need your support to plant trees for three community forests, and individual trees outside huts and kindergartens, in all our 100 villages to help improve the lives of children struggling to survive in one of the most deprived regions of the world. Over 14 different varieties of drought resistant trees

provide shade and fruit to families and their animals, as well as by-products that we teach families to use to improve their lives long-term. *"I have seen for myself how the birds return as soon as there is a tree growing where once there was just sand"* said Patricia Parker MBE Founder.

## Please will you help us turn the desert green again?

It costs just **£10** to plant five seedlings in a community garden  
**£15** plants three trees outside straw huts in our villages  
**£45** is enough for 20 fruit trees in a village

## Donate Trees Today to Give Darfur's Children a Future

And if you'd like to give trees as a gift on behalf of a loved one, we can send you a personalised Gift Certificate for your donation.
